MASTER'S DEGREE IN QUANTITATIVE ECONOMICS

OBJECTIVES

The main objective of this Master's degree is to provide students with an education in advanced economics, thus enabling them to undertake research in this field. More specifically, the aim is to locate students at the cutting edge of research in various areas of Economics so that, upon completion of the course, they are equipped to undertake their doctoral thesis successfully.

Students that complete the Master's Degree in Quantitative Economics should have in-depth knowledge of the latest advanced concepts and methodologies in the field, enabling them to analyse complex economic problems and apply a conceptual framework to the specific circumstances of economic agents, including individuals, businesses and institutions. This knowledge must necessarily include quantitative tools in mathematics, statistics and econometrics, hence the special emphasis on teaching quantitative methods.

The course programme should equip Economics graduates that complete the Master's Degree in Quantitative Economics to pursue an academic or professional career. The generic and specific competencies developed on the Master's course incorporate recommendations from the *Tuning Project* (Tuning Educational Structures in Europe. Universities' contribution to the Bologna process, 2006). Particular attention has also been paid to the "*Subject Benchmark Statements. Economics*" from the UK's Quality Assurance Agency for Higher Education.

GENERAL COURSE PROGRAMME

The Master's Degree in Quantitative Economics consists of 120 ECTS credits to be taken over two academic years. In the first year, students take ten compulsory subjects worth 6 ECTS credits each. In the second year, students take a compulsory subject, Introduction to Research into Economics, worth 5 ECTS credits, and choose another nine optional subjects, all worth 5 credits each. They must also complete the Final Master's Project, which is worth 10 ECTS credits.

The Master's Degree in Quantitative Economics is divided into terms. Each term lasts 12 weeks, except for the first term of the first year, which lasts 15 weeks. During the first ten weeks of each term (13 weeks in the first term of the first year), students attend theoretical and practical classes in each subject, with final exams taken in the last two weeks of each term. In the first year, students study four compulsory subject areas: Mathematics, Microeconomics, Macroeconomics and Econometrics. Mathematics is an important tool in Economics and the subject, worth 6 ECTS credits, will be taught in the first term. The other three subject areas taught in the first year are also worth 6 ECTS credits each, and students study one subject per term from these three areas. In the first term of the second year, students take a compulsory subject, Introduction to Research into Economics, worth 5 ECTS credits. Students in the second year also choose nine optional subjects (from at least three different modules) from the list of 18 possible subjects available. The specific subjects offered each year will depend on student preferences and on the availability of internal and external teachers that year in the Foundations of Economic Analysis Department. Finally, during the last two terms of the second year, students complete their Master's Final Project, under the supervision of either a teacher in the Foundations of Economic Analysis Department, or one of the external teachers collaborating on the Master's degree programme that year.

ENTRY REQUIREMENTS AND SELECTION CRITERIA

According to the Regulations of the University of Alicante, the following requirements must be complied to have access to official taught Master's degrees:

1. To be in possession of a SPANISH OFFICIAL GRADUATE DEGREE CERTIFICATE or other issued by an institution of higher education within the EHEA (European Higher Education) that enables the holder to have access to Master's degrees in the issuing.
2. To be in possession of an officially approved FOREIGN HIGHER EDUCATION DEGREE CERTIFICATE that had been recognised as equal to the degree that allows access to the requested studies.
3. To be in possession of a UNIVERSITY DEGREE CERTIFICATE obtained in a University or Higher Education Institution of COUNTRIES OUTSIDE THE EHEA, without the prior approval of their studies. In this case, the following should be considered:
 - Non- recognised degree certificates shall require a technical report showing an equivalence statement issued by the University of Alicante ([ContinUA – Continuing Education Centre](#)), for which the corresponding fee should be paid.
 - Access through this way does under no circumstances imply prior official approval of the holder's degree certificate, nor its recognition for purposes other than studying a master's degree.

ADMISSION AND ASSESSMENT CRITERIA

1.- Admission Profile

This course is primarily aimed at graduates in Economics, although graduates in Mathematics, Physics, Engineering and Business Administration and Management, among others, are also eligible for admission.

All students whose first language is not English will be required to submit recent proof that their command of written and spoken English is sufficient to ensure that their academic progress will not be hindered by language difficulties.

In accordance with the Common European Framework of Reference for Languages, an applicant's command of English must be equivalent to:

1. **International English Language Testing System (IELTS):** global mark of **6.5**, with a minimum of **6.0** for each of the papers.
2. **Test Of English as a Foreign Language (TOEFL):** mark of **580**, plus **4** in the Test of Written English (TWE).

2. Assessment criteria

Applicants will be selected according to the following criteria:

- Grades obtained for previous studies, above all in subject areas related to the Master's Degree (**60%**).
- References (**30%**).
- Other achievements, such as training courses or research related to any of the subjects areas covered by the Master's Degree course (**10%**).

Students have to pre - register [online](#) and attach the following documents:.

- Statement of purpose (or research).
- Official transcripts from each University which conducted studies. If the original transcripts are not written in English or Spanish, must be accompanied by a translation.
- Official academic diplomas at each University which conducted studies. If the original transcripts are not written in English or Spanish, must be accompanied by a translation.
- Curriculum Vitae.
- Two letters of recommendation.
- Copy of the Passport.

Two letters of reference must be **directly** sent by the letter-writers to qed@ua.es

PRE-ENROLMENT AND ENROLMENT

PRE-ENROLMENT [+info](#)

Students who intend to study for an officially recognised Master's Degree at the UA should complete

Frequently asked questions**ENROLMENT [+info](#)**

Following publication of the final list of those admitted to the course, an email containing a user password will be sent to successful applicants, enabling them to enrol via the **Campus Virtual** in accordance with the guidelines and deadlines specified annually.

In the registration process, the **documents issued abroad** must be official, duly notorised and translated. Further information:

TIMESCALE FOR IMPLEMENTATION

- [Timescale](#)
- [Procedure](#)
- [Discontinued programmes](#)

1. Timescale for implementation of the Master's Degree course

Academic year	Implementation of Master's degree
2010-2011	1st year
2011-2012	2nd year

2. Procedure for equivalence recognition, where appropriate, between the current and the new course programme.

Since all the compulsory and optional subjects in the new Master's degree are identical to those of the current Official Master's Degree in Quantitative Economics, students on the existing course will obtain automatic credit equivalence recognition for the new course.

3. Studies being phased out and replaced by the proposed degree course:
